

Dear Colleagues,

Over the past 20 years I have been interviewing new graduates for hire at our Los Angeles Institute of Foot and Ankle Surgery. Unfortunately, it is my observation that many new graduates are not very well trained and not ready to practice on high level within hospital clinical settings.

My goal is to create several training programs and educational seminars to improve overall training of new podiatric physicians.

I am a founder of Los Angeles Institute of Foot and Ankle Surgery, a practice with 6 podiatric surgeons. I am also a founder of Eternal Nation Foundation, a charity organization for injured soldiers and civilians in Armenia. Thus, it is very well known to me that Leadership is not a position, but a responsibility.

I am willing and ready to take one more responsibility on my shoulders.

Truly yours,

Armen Hagopian, DPM, FACFAS
